

Center for Polycystic Kidney Disease Research

Polycystic Kidney Disease Symposium 2010

May 17st, 2010 (9:30 AM - 5 PM)

The Joseph Martin Conference Center at Harvard Medical School (Bray Room),
77 Avenue Louis Pasteur, Boston, MA 02115

This one day symposium is organized by the PKD Center (director, Jing Zhou, M.D., Ph.D.) and will focus on the new molecular mechanisms underlying PKD.

Topics covered:

- Clinical presentation and update on current clinical trials of PKD
- Length control of primary cilia
- PKD proteins and apoptosis
- Centrosomes and cell cycle
- Protein trafficking through Golgi and BBSomes
- Wnt and Hedgehog signaling
- Planar cell polarity

Featured Speakers:

Bradley Denker	Karl Lehtreck
Stephen Doxey	Jagesh Shah
Iain Drummond	Pamela Tran
Julie Jonasson	Ted Steinman
Jordan Kreidberg	Jing Zhou

ADPKD is the most common life-threatening monogenic genetic disease, affecting more people than cystic fibrosis, muscular dystrophy, hemophilia, Down syndrome and sickle cell anemia - combined

Registration (including coffee break): Free to all attendees

Seats are limited, so please register online at:
