

Center for Polycystic Kidney Disease Research

Polycystic Kidney Disease Symposium 2012

May 14th, 2012 (8:00 AM – 5 PM)

The Joseph B. Martin Conference Center at Harvard Medical School (Bray Room), 77 Avenue Louis Pasteur, Boston, MA 02115

This one day symposium is organized by the PKD Center (director, Jing Zhou, M.D., Ph.D.) and will focus on the new molecular mechanisms underlying PKD.

TOPICS COVERED:

- IFT complex and Hedgehog signaling
- Polycystin signaling in zebrafish
- G protein signaling in PKD
- Bardet-Biedl Syndrome and ADPKD
- Nek kinase and cystic disease
- Induced pluripotent stem cells and PKD
- Review of latest clinical trials in PKD
- New therapeutic strategies for PKD

Presenters: Members of the PKD Center at various Harvard Institutions and other distinguished speakers

Registration (including coffee breaks):
Free to all attendees

Seats are limited, so please register online at:
